The Bridge.

The falling of Limestone Bridge yesterday afternoon, from the washing away of the foundation of the east abutment, after the heavy rain which fell, was a serious public disaster, and has occasioned great present and prospective inconvenience to the citizens of both ends of the city. Many persons were in town from the country, as well as from the fifth ward, with their vehicles, who could not return to their homes, and all commerce between town and the country east of us, is, therefore, temporarily cut off. At this season when the crops of wheat and tobacco are being delivered to the merchants, it is a serious grievance for intercourse to be thus cut off, even though it be for the very least possible time.

The city council met last night, and will take immediate steps to provide temporary means of getting into and out of town. The breach upon the Fleming turnpike, the frail condition of the passway upon the railroad structure, and the destruction of Limestone Bridge, make all the usual accesses to the city upon the eastern side unavailable, and call aloud for the most active and speedy exercise of power by the city council, to provide immediate means of relief.

Before a good, solid and substantial bridge can be built to replace the one which has fallen, some temporary mode of getting into town and getting out of it, must be provided. What that will be must be determined by the city council. It occurs to us, that at least for immediate relief, the placing of a ferry boat on the river to ply between the landing in the fifth ward and the landing in the old town, would be the surest and the best. Loaded wagons could drive on in East Maysville, and deliver their freight in Maysville with little inconvenience, while foot passengers would be amply accommodated.

A new bridge must be built. We hope this will not be undertaken without the advice of some skilled engineer. No less than three bridges, the crude design and work of which were of the employees of the council, who were without experience or skill, and all of these have fallen because of defective construction, location and design. The new bridge should have a different site, be built after the best design and of the very best material—it should be built to last. The taxpayers of Maysville would more cheerfully see ten or twelve thousand dollars expended to have a durable and permanent bridge erected, than to have half that sum expended upon a botched contrivance, like that which has just fallen. Give us a solid and durable bridge, let the cost be what it may.

The New York Commercial Bulletin, considered the most careful paper in the country, thinks our wheat crop will foot up at least 600,000,000 bushels, over a hundred million more than was ever produced in one year.

It is estimated that the wool clip of Texas this season will amount to 23,000,000 pounds, which, at an average of 22 cents per pound, will bring \$6,300,000. The number of sheep in the state is placed at 7,000,000.

NEWS BREVITIES.
